

Complete Kontrol and Maschine Integration

EastWest's award winning collection of virtual instruments is now NKS-ready! Below are the steps to integrate all installed Play Libraries into Native Instruments Complete Kontrol S-Series Keyboards and Maschine. Once complete, instruments will be available in the Complete Kontrol's Library Browser, and parameters will be available for editing.

Step 1: Download the EastWest NKS Support Installer

To download the EastWest NKS Support installer, visit the Software & Product Updates page in the EastWest Support Center at the following link:

<http://www.soundsonline.com/Support?section=updates&article=>

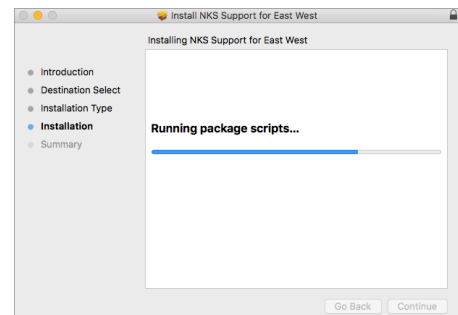

In the 'EastWest NKS Support' section, click on either the Mac or Windows icons to download the installer per your operating system.

Step 2: Run the Installer

Once the installer has downloaded, double-click on the installer to launch it and proceed through the prompts to complete the installation.

Please Note! Only Play Libraries that are currently installed into Play will be made NKS-ready.

You can run the EastWest NKS Support installer at anytime after installing additional EastWest Play Libraries to make them NKS-Ready.

Step 3: Launch Complete Kontrol to Automatically Update Libraries

After running the EastWest NKS Support installer, the next time you launch Complete Kontrol or Maschine it will scan all installed Play Libraries as shown below, and make them ready for use.
